Hiring Team

PT Ebiz Prima Nusa (Ebizmark)

Re: Application for Full Stack Developer Intern - ASCEND Ebiz Internship Batch X

Dear Hiring Team,

I am writing to apply for the Full Stack Developer Intern position at Ebizmark. I am a final-year Informatics Engineering student at Universitas Islam Riau, graduating this October, and currently completing an internship at Diskominfo Riau Province.

What drew me to this role specifically is the scale of what Ebizmark runs day to day: a training platform with bootcamps, e-courses, and webinars serving hundreds of thousands of participants, backed by a dashboard that has to handle registration, certificates, and role-based access without breaking. That is close to the kind of system I have spent the past year building on my own.

For my most recent project, NewsPortal, I built a news platform with four user roles and a full editorial workflow, from draft to review to published, enforced through Next.js middleware and Auth.js session checks on every request. I also built a nutrition monitoring dashboard for Indonesia's free meal program (SPPG) with separate views for four different user types, and a job tracker with its own authentication and rate limiting. None of these were class assignments. I picked the problems and the stack myself, then dealt with whatever broke.

I work across two ecosystems, Next.js/TypeScript and Laravel/PHP, which I think matters for an intern role: I can pick up whichever stack the team is running without much of a ramp-up period. During my internship at Diskominfo, I helped build a reusable Laravel starter template that is now used as the base for new departmental projects, so I have also worked inside a codebase other people depend on, not just my own repositories.

I would like to spend this internship on a real product used by real people, and learn how a team like Ebizmark's actually ships and maintains one. I am available to start immediately and would be glad to walk through any of the projects above in more detail.

Thank you for your time and consideration.

Best regards,

Mohd. Farhan. S
